Art Unit: 2833

1. The disclosure is objected to because of the following informalities:

a. Contrary to line 7 of paragraph 16, **78** does not appear to indicate holes in Fig. 2 or 3, the only places where 78 is found.

b. In addition, paragraph 16 indicates that the holes 78 are “on the third side of the shell,” yet 78 indicates structures on two different sides in Fig. 2.

c. On the penultimate line of paragraph 16, it appears that “80” should be changed to -86-.

d. On line 10 of paragraph 17 “passes” should be -pass-.

e. On line 11 of paragraph 17 it appears that -are- should be inserted after “and.”

f. On line 12 of paragraph 17 “post” should be plural.

g. On line 14 of paragraph 17 it appears that “second” should be deleted, as no first posts are present.

Appropriate corrections are required.

2. Claim 7 is objected to because the assembly is not assembled in a linear manner. As defined by claim 5, the “assembly” includes the adapter, the shell and the circuit board. As seen in Fig. 3, the connection between the circuit board and the shell is perpendicular to the connection between the shell and the adapter. Appropriate correction is required.

3. In view of applicant’s remarks and amendments of April 27, 2005, claims 1 and 4-6 are allowed.

4. This application is in condition for allowance except for the formal matters discussed above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.
